

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

VOLUME 13 1912

PAGES

BILL, E. GORDON, of New Haven, Conn. An existence theorem for a problem of the calculus of variations in space	50
BLISS, GILBERT AMES, of Chicago, Ill. A generalization of Weierstrass' preparation theorem for a power series in several variables. . . .	133
CONNER, J. R., of Baltimore, Md. Multiple correspondences determined by the rational plane quintic curve	265
DICKSON, L. E., of Chicago, Ill. Linear algebras.	59
FIELDS, J. C., of Toronto, Ont. A method of 'proving certain theorems relating to rational functions which are adjoint to an algebraic equation for a given value of the independent variable.	164
GRONWALL, T. H., of Chicago, Ill. On a theorem of Fejér's and an analogon to Gibbs' phenomenon.	445
HODGSON, JOSEPH ELLIS, of Baltimore, Md. Orthocentric properties of the plane directed n -line.	199
HURWITZ, WALLIE ABRAHAM, of Ithaca, N. Y. On the pseudo-resolvent to the kernel of an integral equation.	405
INGOLD, LOUIS, of Columbia, Mo. Functional differential geometry. .	319
JACKSON, DUNHAM, of Cambridge, Mass. On the degree of convergence of the development of a continuous function according to Legendre's polynomials.	305
————— On approximation by trigonometric sums and polynomials.	491
KELLOGG, O. D., of Columbia, Mo. Harmonic functions and Green's integral	109
LAMOND, J. K., of Middletown, Conn. Improper multiple integrals over iterable fields	434
LANDAU, E., of Göttingen, Germany. Ueber eine idealtheoretische Funktion	1
LIPKE, JOSEPH, of Boston, Mass. Natural families of curves in a general curved space of n dimensions.	77
MACMILLAN, WILLIAM DUNCAN, of Chicago, Ill. An existence theorem for periodic solutions.	146

MILES, E. J., of Ithaca, N. Y. The absolute minimum of a definite integral in a special field.	35
MILLER, G. A., of Urbana, Ill. Infinite systems of indivisible groups. .	419
MOORE, ROBERT L., of Philadelphia, Penn. A note concerning Veblen's axioms for geometry.	74
MOULTON, F. R., of Chicago, Ill. A class of periodic orbits of superior planets	96
OSGOOD, WILLIAM FOGG, of Cambridge, Mass. A condition that a function in a projective space be rational	159
RICHARDSON, R. G. D., of Providence, R. I. Theorems of oscillation for two-lined differential equations of the second order with two parameters	22
ROEVER, WILLIAM H., of St. Louis, Mo. The southerly and easterly deviation of falling bodies for an unsymmetrical field of force	469
ROWE, J. E., of Hanover, N. H. Bicombinants of the rational plane quartic and combinants of the rational plane quintic	387
SHAW, JAMES BYRNIE, of Urbana, Ill. Quaternion developments with applications.	279
URNER, S. E., of Oxford, O. Certain singularities of point transformations in space of three dimensions	232
VANDIVER, H. S., of St. Louis, Mo. Theory of finite algebras	293
VAN VLECK, EDWARD B., of Madison, Wis. On the extension of a theorem of Poincaré for difference equations	342
——— One-parameter projective groups and the classification of collineations.	353
WHITE, MARION BALLANTYNE, of Lawrence, Kans. The dependence of focal points upon curvature for problems of the calculus of variations in space	175
Notes and errata: volumes 7 and 13	516
